

CONTENTS.

PART I.

ELEMENTS OF PHARMACY.

	Page
Object and division of Pharmacy,	xvii

SECTION I.

EPITOME OF CHEMISTRY.

Attraction and Repulsion,	xviii
Gravity. Aggregation,	xix
Affinity,	ib.
Dr Thomson's classification of simple bodies,	xxi
Compound bodies,	ib.
Light,	xxii
Caloric,	xxiii
Electricity,	xxvi
Galvanism,	xxvii
Magnetism,	xxviii
Oxygen,	ib.
Chlorine,	xxxii
Iodine,	ib.
Fluorine,	xxxii
Nitrogen, (azote),	ib.
Hydrogen,	xxxiv
Carbon,	xxxvi
Boron,	xxxviii
Sulphur,	xxxix
Phosphorus,	xl
Metals and metallic oxides, ...	xliii
Alkalizable metals,	xliv
Oxidizable metals,	xlix

	Page
Acidifiable metals,	liv
Compound oxides, acids, and alkalies,	lv.
Compound oxides,	ib.
Ternary oxides,	lviii
Quaternary oxides,	lxiii
Compound acids,	lxviii
Ternary acids,	ib.
Quaternary acids,	lxvii
Compound alkalies,	ib.
Characters of secondary salts derived from their acids,	lxxiii
Characters of salts derived from their bases,	lxxvi

SECTION II.

PHARMACEUTICAL OPERATIONS.

Collection and preservation of simples,	lxxix
Mechanical operations of pharmacy,	lxxxii
Weights and Measures,	ib.
Specific gravity,	lxxxiv
Mechanical division, by pulverization, trituration, levigation, and granulation,	lxxxv
Mechanical separation, by sifting, elutriation, decantation, filtration, expression, and despumation,	lxxxvii
Apparatus,	xc
Vessels,	ib.
Lutes,	xcii
Heat and fuel,	xciv
Furnaces,	xcvi
Chemical operations,	xcviii
<i>A.</i> Change in the form of aggregation,	ib.
<i>a.</i> Liquefaction,	ib.
<i>b.</i> Fusion,	ib.
<i>c.</i> Vitriification,	ib.
<i>d.</i> Vaporization,	xcix
1. Ustulation,	ci
2. Charring,	ib.
3. Evaporation,	cii

CONTENTS.

xiii

	Page
Chemical operations,	
4. Concentration,	cii
5. Inspissation,	ib.
6. Exsiccation,	ib.
Condensation,	
1. Distillation,	ciii
2. Circulation,	cv
3. Rectification,	cix
4. Sublimation,	ib.
<i>f.</i> Congelation,	ib.
<i>g.</i> Coagulation,	ib.
<i>B.</i> Effecting combination,	cix
<i>a.</i> Solution,	cxi
6. Extraction,	cxii
<i>c.</i> Infusion,	ib.
<i>d.</i> Maceration,	ib.
<i>e.</i> Digestion,	ib.
<i>f.</i> Decoction,	cxiii
<i>g.</i> Absorption,	ib.
<i>h.</i> Consolidation,	ib.
<i>C.</i> Effecting decomposition,	ib.
<i>a.</i> Dissolution,	ib.
<i>b.</i> Precipitation,	cxiv
<i>c.</i> Crystallization,	cxv
<i>d.</i> Oxygenizement,	cxvii
<i>e.</i> Deflagration,	cxviii
<i>f.</i> Di-oxygenizement,	cxix
<i>g.</i> Fermentation,	cxxi

APPENDIX.

Weights and measures,	cxxxv
Tables of specific gravity,	cxl
Formulae for comparing the scales of different thermometers with each other,	cxlv

	Page
Table of the thermometric degrees, at which some remarkable chemical phenomena occur,	cxvii
Table of freezing mixtures,	cl
Tables of simple affinity,	clii
Relative attractions,	clv
Cases of mutual decomposition,	ib.
Cases of disposing affinity,	clvi
Table of incompatible salts,	ib.
Table of specific heats of equal weights of some bodies compared with water,	clvii
Metallic precipitates,	clviii
Table of the solubility of different substances in water,	clix
Table of the solubility of different substances in alkohol,	clxi
Table of the proportion of oil and suets in various fats,	clxii
Table of the absorption of gases,	clxiii
Table of efflorescent and deliquescent salts,	ib.
Table of chemical equivalents,	clxiv
Composition of some organic bodies,	ib.
Pharmaceutical calendar,	clxv

PART II.

MATERIA MEDICA.

General observations,	1
Natural, Medical and Pharmaceutical History of the different Articles contained in the Pharmacopœias of London, Dublin, and Edinburgh, arranged chiefly according to the nomenclature of the Edinburgh College,	2

APPENDIX.

NO. I. Concise account of some substances contained in some of the best foreign Pharmacopœias, but not received into the lists of any of the British Colleges,	277
II. List of animals which furnish articles of the Materia Medica, arranged according to Cuvier's system,	296

CONTENTS.

X†

	Page
NO. III. List of the genera of medicinal plants, arranged according to the system of Linnæus,	297
IV. List of officinal genera, according to the natural system of Jussieu, improved by Ventenat,	300
V. List of officinal substances belonging to the mineral kingdom.	304

PART III.

PREPARATIONS AND COMPOSITIONS.

CHAP. I. Sulphur,	305
II. Acids,	311
III. Alkalies and alkaline salts,	334
IV. Earths, and earthy salts,	375
V. Antimony,	391
VI. Silver,	408
VII. Arsenic,	411
VIII. Copper,	413
IX. Iron,	416
X. Mercury,	430
XI. Lead,	455
XII. Tin,	459
XIII. Zinc,	ib.
XIV. Alcohol, ether, and ethereal spirits,	465
XV. Drying of flowers and herbs,	477
XVI. Expressed juices, and inspissated juices,	479
XVII. Fixed oils,	486
XVIII. Oily preparations,	488
XIX. Volatile oils,	491
XX. Distilled waters,	500
XXI. Empyreumatic volatile oils,	504
XXII. Distilled spirits,	507
XXIII. Infusions,	511
XXIV. Decoctions,	521
XXV. Mucilages,	531
XXVI. Syrups,	533
XXVII. Medicated honeys,	543
XXVIII. Emulsions and mixtures,	548
XXIX. Medicated vinegars,	554
XXX. Tinctures,	557

	Page
CHAP. XXXI. Tinctures made with ethereal spirits,	582
XXXII. Ammoniated or volatile tinctures,	584
XXXIII. Medicated wines,	588
XXXIV. Extracts and resins,	592
XXXV. Powders,	606
XXXVI. Conserves, electuaries and confections,	615
XXXVII. Troches,	622
XXXVIII. Pills, ..	624
XXXIX. Cataplasms,	653
XL. Liniments, ointments, cerates, and plasters,	654

TABLES, shewing the proportion of antimony, opium and mercury, contained in different compositions,	663
Posological and prosodial table,	665
Table of synonymes,	676
English index,	701
Latin index,	719
