I N D E X

1. The first part of the book is devoted to a general history of the subject, and to a description of the various species of the genus. The second part contains a detailed account of the life history of the most important species, and of the methods of their culture and propagation. The third part is devoted to a description of the various diseases to which the genus is subject, and to the methods of their prevention and cure. The fourth part contains a list of the various species of the genus, and of the localities where they are found. The fifth part is devoted to a description of the various uses of the genus, and to the methods of their preparation and application. The sixth part contains a list of the various species of the genus, and of the localities where they are found. The seventh part is devoted to a description of the various uses of the genus, and to the methods of their preparation and application.
