

T a x e  
der einfachen und zubereiteten Arzneyen.

Eine halbe Unze der sogleich zu benennenden Arzneyen wird nach der österrreichischen Apothekertaxe um so viel Kreuzer verkauft, als hier angezeigt werden. Der Guldenpreis aber steht bey jedem einzelnen Arzneymittel.

Es ist aber billig, daß man dem Apotheker erlaubet, den Preis dieser Arzneyen einige Zeit zu erhöhen, so lange ihre rohen Materialien in einem höhern Preis verkauft werden.

## A.
