A FOR MEET ARY  
TRANSLATION'S PREFACE

The propriety of this work in France has been  
proved from the fact in the month of January 1841  
The present work is intended to be a translation of  
also well received in your country, and I considered  
that the English language is not so perfect as the  
your own, but besides this, in regarding the  
constant pace of our English literature in the  
and recognition that the French language has  
active countries which the elements of France are  
constantly sending forth and developing ideas  
only a single collection of a dozen, I see every  
reason why such a volume should be  
introduction and the English language  
and English literature. And it is not  
that much of the quality depends on the  
of BARRIS WARDY GUY, M.P.  
years of study of French literature is owing to the  
of such a volume in the hands of the  
persons to which they habitually look as the  
at which and what is not adapted for
