

LIST OF WOODCUTS IN VOL. I.

Figs.		Page.	Figs.		Page.	
1.	Ancient baths	52	42.	Oblique rectangular prism	169	
2.	Apparatus for medical electricity	67	43.	Oblique octohedron with a rhombic base	169	
3.	Flower of raphanus sativus	115	44.	Oblique rhombic prism	169	
4.	Flower of glechoma hederacea	115	45.	Doubly oblique octohedron	170	
5.	Fruit of picea vulgaris	115	46.	Doubly oblique prism	170	
6.	Inflorescence of fœniculum vulgare	115	47.	Fuci yielding iodine	223	
7.	Lolium temulentum	115	48.	New Geyser	247	
8.	Festuca quadridentata	116	49.	Hydrometer	315	
9.	Cactus opuntia	125	50.	Tincture percolator	326	
10.	Amanita muscaria	126	51.	Vinegar generator	346	
11.	Apparatus to illustrate physical absorption	128	52.	Section of a pyroligneous acid still	347	
12.	Apparatus used by Messrs. Morgan and Addison in their experiments on the absorption of poisons	131	53.	Crystal of citric acid	357	
13.			54.	Crystals of tartaric acid	361	
14.			55.			
15.	Ditto	135	56.	Boracic acid lagoons	390	
16.			57.	Chambers for crystallizing and drying boracic acid	391	
17.	Ditto	136	58.	Sarcoptes hominis	399	
18.			59.	Cascade de Vinagre	402	
19.			60.	Oil of vitriol chamber	403	
20.	Inhaling bottles	159	61.	Prism of bisulphate of potash	431	
21.			62.	Crystals of sulphate of potash	433	
22.	Octohedron	167				
23.	Dodecahedron	167				
24.	Cube	167	63.	Tessellated appearance of a plate of sulphate of potash in polarized light	433	
25.	Hemioctohedron or tetrahedron	167	64.			
26.	Square octohedron	167	65.	Crystal of nitre	436	
27.	Square prism	167	66.	Prism of ditto	436	
28.	Combination of octohedron and prism	167	67.	Crystals of carbonate of potash	446	
29.	Images caused by the action of calcareous spar on polarized light	168	68.			
30.			31.	Rhombohedron	168	69.
31.	Hexagonal prism	168	70.			
32.	Combination of the rhombohedron with the hexagonal prism	168	71.	Crystal of tartrate of potash	451	
33.	Scalenohedron	168	72.	Prism of sulphate of soda	461	
34.	Images caused by the action of nitre on polarized light	169	73.	Crystals of carbonate of soda	469	
35.			36.			74.
36.	Octohedron with a rectangular base	169	75.	Ditto, of tartarized soda	475	
37.	Right rectangular prism	169	76.			
38.	Octohedron with a rhombic base	169	77.	Chlorometer	496	
39.	Right rhombic prism	169	78.	Crystals of sulphate of magnesia	512	
40.	Oblique octohedron with a rectangular base	169	79.			
41.			80.	Crystal of alum	515	
			81.	Berzelius's reduction tube for arsenic	523

Figs.	Page.	Figs.	Page.
82.	526	90.	573
Apparatus for passing sulphuretted hydrogen through metallic solutions		Crystal of nitrate of silver	
83.		91.	611
84.		Henry's apparatus for the sublimation of calomel	
85.	528	92.	612
86.		Crystal of calomel	
Marsh's apparatus		93.	618
		Crystal of corrosive sublimate	
87.	529	94.	632
Apparatus for subjecting arseniuretted hydrogen to the action of heat or nitrate of silver		95.	663
88.	556	Crystals of bityanide of mercury	
Octohedron of emetic tartar		96.	663
89.	556	Crystal of acetate of lead	
Apparatus for reducing sulphuret of antimony		97.	676
		Crystal of sulphate of zinc	
		98.	701
		Crystal of ferrocyanide of potassium	
		99.	704
		Crystal of sulphate of iron	
		100.	704
		Crystal of sulphate of iron
