Water sufficient to prevent an empyreuma.

Draw off one gallon.

We have ordered the Waters to be distilled from the dried herbs, because fresh are not ready

ready at all times of the year. Whenever the fresh are used, the weights are to be increased. But, whether the fresh or dried herbs are employed, the operator may vary the weight according to the season in which they have been produced and collected.

Herbs and seeds, kept beyond the space of a year, are improper for the distillation of Waters.

To every gallon of these Waters add five ounces, by measure, of proof-spirit.
