| Table of Contents..... | 140 |

FUTURE BULLETINS.

This Bulletin will be followed by a History of the American Alkaloids, Resins, Resinoids and Concentrations, comprising Bulletin Number 2, Pharmacy Series. In connection with the historical data therein contained, it will be prolific in personal incidents known to the editor, together with much information derived from personal correspondence with those concerned in that historic epoch in American Pharmacy and Medicine. This leads us to believe that the proposed Bulletin will be one of the most valuable as yet issued by us.

THE LLOYD LIBRARY.
