

Tabelle

über

die zwischen $+12^{\circ}$ bis 25° eintretenden Veränderungen der bei den Revisionen der Apotheken festzustellenden specifischen Gewichte officineller Flüssigkeiten.

Bei denjenigen Flüssigkeiten, deren spec. Gewicht bei $+15^{\circ}$ nicht auf eine einzige Zahl beschränkt ist, sondern sich innerhalb gewisser Grenzen bewegen darf, ist eine Schwankung in gleicher Höhe bei jedem der Temperaturgrade zwischen $+12^{\circ}$ bis $+25^{\circ}$ gestattet.

	15°	12°	13°	14°	15°
Acidum aceticum dilutum.....	1.041	1.042	1.042	1.041	1.041
Acidum hydrochloricum.....	1.124	1.125	1.125	1.124	1.124
