### **Unguentum Zinci oleïnici.**

Ungt. Zinci Oleatis.

Rp. Zinci oleïnici

Ungt. Paraffinae  $\hat{a} P.$

Misce leni calore.

### **Urea.**

$\text{CH}_4\text{N}_2\text{O}$ . Ureum. Carbamidum.

Rp. Kalii ferro-cyanati flavi q. v.

In pulverem redactum vasi ferreo ingere et supra carbones ardentes inter agitantum ab aqua crystallina plane libera. Hujus salis exsiccati

Partes 28

commisceantur cum

Mangani hyperoxydati subt.

pulv. P. 14,

tum in vas ferreum minime profundum ingestas inter continuum agitationem rutile aestuent, cavendo, ne miscela in massam unam coëat. Igitur agitatione diligenter massae conglutinatio impedienda est. E miscela post aestuationem refrigerata et trita Aquae destillatae frigidissimae non nimia quantitate iterum iterumque macerando sal eliciatur.

Solutiones sale saturatas priores ab ulterioribus dilutioribus separa.

In solutionibus dilutioribus conquassando solve

Ammonii sulfurici sicci *P. 25*, deinde eas cum solutionibus saturatis confunde et per aliquod horas loco frigido sepone. Liquor a Kalio sulfurico orto filtratione separatus in bâlneo vaporis temperaturae  $75^{\circ}$  Cels. therm. non excedentis ad volumen diuidum remanens evaporetur et loco frigido seponatur. Iterum Kalio sulfurico demissso separato, fluidum in balneo vaporis ejusdem temperaturae ad siccum evaporetur. Residuo contrito, in eucurbitam vitream ingestu, affunde

Spiritus V. rectifss. *P. 60—70* circiter, et ad lenem ebullitionem calefac. Solutionem fervidam, per linatum colatam, Spiritus Vini magna parte elicit destillando e retorta vitrea, ad crystallisationem loco frigido sepone. Crystalla decoloria demissa collige, inter strages chartae bibulac premendo siccata et in lagenula obturata asserva. Effic. circiter *P. 18*. Sint crystalla prismatica acicularia, saporis refrigerantis, amariuscui, odoris expertia. *Dosis*: 0,5—1,0—2,0 (affectiones hydropiciae).

### Urea nitrica.

Ureum nitricum.

Rp. Acidi nitrici (p. spec. 1,18—1,20) *P. 10*.

Hoc acidum, antea in vas porcellaneum apertum ingestum, usque ad ebulliendum calefac, ut a gasis fortasse adhaerentibus nitrosis plene liberum fiat. Acido tum affunde inter agitandum

Ureae purae *P. 3*, in

Aqua dest. fervidae *P. 3* solutas. Tum loco frigido per 24 horas sepone. Massa orta crystallina colando separata, e liquore colato evaporando et refrigerando crystallula elice.

Crystallula omnia collecta in Aquae destillatae ferventis duplo solvantur et iterata crystallisatione depurentur. Le- nissimo calore siccata asserventur. Efficiuntur circiter *P. 6*. Sint crystallula lamellaria sive acicularia alba acida.

### Urethanum.

Aethyl-Urethan. Aethylo-aether carbaminicus.  $\text{CO-NH}_2\text{-O-C}_2\text{H}_5$ .

Rp. Ureae nitricae tritae

Spiritus V. absolutu  $\hat{a} P.$

Ingere in tubum vitreum, quod conflando claudatur. Tum tubum in balneum Calcii chlorati impone et per horas tres vel quatuor ad  $120—130^{\circ}$  C. calefac. Massam refrigeratam in Aqua destillata solve et affuso

Aethere aethylico bis terve exquassa. Liquores aethereos decanthatos destillando ab aethere quam maxime libera, tum massam residuum solvendo in aquae copia parva filtrando seponendoque in crystalla transdue, quae operatio, si opus fuerit, repetatur. Sint crystalla columnaria decoloria, saporis refrigerantis, calore  $50^{\circ}$  liquefcentia, calore  $175^{\circ}$  C. sublimatum praebentia, facile solubilia in aqua, spiritu, aethere, chloroformio.

*Dosis*: 2,0—4,0 in aqua et syrupo soluta vel semiorio 1,0 bis quaterve. (Hypnoticum, agrypnia nervosa, cardiopathia).

### Vanilla pulverata.

Rp. Pulpae e Siliquis Vanillae exemptae *P. 1*

Sacchari Lactis *P. 4*.

Terendo in mortario porcellaneo commisceantur.

### Vanilla saccharata.

Pulvis Vanillae cum Saccharo.

*Sucre de la Vanille*.

Rp. Vanillae *P. 1*.

Minutim concisa cum

Sacchari *P. 9*

conteratur, donec pulvis aequabilis effectus fuerit, qui per cibrum tractectus in vase clauso servetur. *Ph. Gall.*

### Vanillina.

$\text{C}_8\text{H}_8\text{O}_3 \sim \text{C}^{16}\text{H}^8\text{O}^6 = 152$ .

Vanillina, quae saepius siliquis Vanillae adhaeret, modo mechanico colligenda est. Vanillina, quam siliqua continet, Aethere extrahatur et, aethere destillando separato, solvendo in aqua, filtrando etc. in crystallula transducta (*Nervinum, stimulans*). *Dosis*: 0,1—0,15—0,2 ter quaterve per diem.
